COMPANY OVERVIEW

About Us

AFTO Energy Limited was formerly registered as AFTO Energy Solutions in 2019 and was later incorporated into a private limited company in 2020 with registration number TMBRS 1012532. Our company has more than 4 years of industrial experience in planning, designing, installation and maintenance of solar systems and inverter or UPS backup systems and also electrical designs and installation.

Our company has highly experienced electrical and solar technicians that are licensed by the Malawi Energy Regulatory Authority (MERA) to carryout electrical and solar works. To maximize customer satisfaction, Our technicians are available every time to offer a wide range of after-sale services to our clients.

Our Vision

To become Malawi's leading and reliable supplier and installer of clean and renewable energy technologies in Malawi

Our Mission

To partner with the government of Malawi in the generation and distribution of uninterrupted electricity for rural and urban populations through affordable off-grid and grid-tied solar and power backup solutions.

Corporate Value

- Reliability
- Integrity
- Timelines
- Affordability
- Efficiency

WHY CHOOSE US

- Licensed by MERA
- 24 hours after-sale services
- Experienced and licensed technicians
- At least 6 months product's warranty

HOW WE DO SOLAR WORK

Our solar work goes through the following steps:

STEP 1

Site survey & load assessment to determine solar potential & energy requirement .

STEP 2

System Design to determine correct system sizing.

STEP 3

System Quotation to determine system & project over cost.

STEP 4

Installation & Testing of the system .

STEP 5
Commissioning & Hand over of the system to the client

COMPANY SERVICES

1. Supply of ICT Equipment

We supply and deliver high quality ICT equipment like computers, printers, copiers and scanners, network devices and hardware, servers, video conferencing equipment, projectors and other multimedia products.

2. ICT Support Services

We offer technical support and assistance to our clients and users of a wide range of ICT equipment and systems like computers, printers, internet and servers among others. We also repair and maintain ICT hardware and software for efficient system operations.

3. Network Installation & Configuration

We install and configure wireless, wired and hybrid networks that use both Wi-Fi and Ethernet cables for internet use, office ICT equipment networking and communications, and office systems automation. We also repair and maintain networks and network devices for network efficiency.

4. ICT Solutions

We design and provide ICT solutions like email systems, instructional software, online learning and interaction platforms, and develop customer-tailored ICT programmes and systems for efficiency and automation.

5. Software & Apps Development

We create support applications that can be installed and used on mobile phones and supporting software programmes for computers to enhance efficiency, reliability and user-friendliness of software for end-users.
